OUR ADVANTAGES

Skilled and Efficient Workforce

Experienced specialists, engineering expertise and efficient execution ensure reliable delivery of shipbuilding and marine projects.

Budget and Time Savings

Efficient planning, optimized production processes and experienced project management help reduce project costs while ensuring on-time delivery.

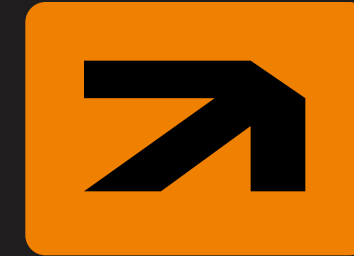

Professional Management

Every project is coordinated by experienced managers who supervise production, maintain effective communication and ensure smooth project execution.

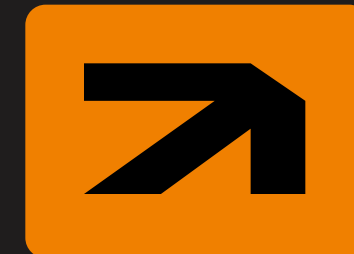

Customer-Focused Approach

We work closely with our customers, providing flexible solutions, transparent communication and reliable support throughout every stage of the project.

Extensive Experience and Expertise

With more than two decades of experience in the marine industry, we have successfully participated in numerous shipbuilding, modernization and repair projects in Finland and abroad.

Strong Partnership Network

Long-term cooperation with leading shipyards, engineering companies and trusted suppliers enables us to provide comprehensive and efficient project solutions.

Certified and Compliant

Our operations comply with international maritime standards and customer-specific requirements, ensuring safe, reliable and high-quality performance.

Commitment to Quality

Quality is an integral part of every project. We continuously improve our processes and maintain high standards throughout all stages of production.

SHIPBUILDING PROJECTS

Comprehensive Shipbuilding and Marine Subcontracting Services.

Helsingin Hitsaus HH Oy is a trusted subcontractor for projects in Finland and abroad. Working with leading Northern European shipyards, we provide skilled workforce, professional supervision and comprehensive production solutions throughout all stages of vessel construction.

Our extensive experience in shipbuilding and marine subcontracting enables us to support customers at every stage of the project, ensuring reliable execution in accordance with the highest industry standards.

SHIPBUILDING PROJECTS

Hull Construction

- Prefabrication of hull elements in workshop
- Sections and blocks construction
- Grand block and hull parts assembling
- Shipyard work and geometry adjustment

Hull Outfitting

- Installation of pipes and pipe systems
- Foundations and supports
- Platforms, gangways and stairs
- Other structural steel elements

Ventilation Systems

- Fabrication and installation of ventilation ducts and units
- Installation of ventilation pipelines and air ducts
- Connection, adjustment and balancing of systems
- Quality assurance and performance testing
- Integration with onboard systems

Insulation Works

- Thermal insulation
- Acoustic insulation
- Fire protection insulation according to SOLAS and IMO standards
- Custom insulation solutions

Electrical Installation

- Cabling and cable route installation
- Switchboard assembly
- Connection and commissioning
- Testing and integration

Turnkey Interior Solutions

- Cabins and Wheelhouse
- Public and crew areas
- Galleys and Pantries
- Provision Stores
- Technical and Machinery Spaces

SHIP REPAIR & CONVERSION

Successful combination of our own production resources, partner's network, technical skills and shipyard's facilities in key shipping areas gives us the opportunity to provide complete solutions for the ship repair focused on time and budget savings.

We provide turnkey ship repair and ship conversion services at shipyards across the Baltic States, Bulgaria, Turkey, Portugal, Sweden and China.

We manage, support and supervise repair projects for commercial, offshore and special-purpose vessels, providing professional project management, technical coordination and reliable execution throughout every stage of the repair process.

SHIP REPAIR & CONVERSION

We offer our clients

- General contracting for turnkey repair projects in shipyards all across the world
- Steel repair and any type of welding works
- Machinery and deck equipment repair
- Repair of hatch covers and hydraulic system/units
- All types of pipework and valve repair
- Interior and carpentry works
- Full project management and technical assistance
- Subcontracting at ship repair yards

Additional support

- Marine equipment procurement and ship supply
- Spare parts sourcing and delivery
- Technical and project management
- Logistics and port-agency coordination
- Pre- and post-repair support

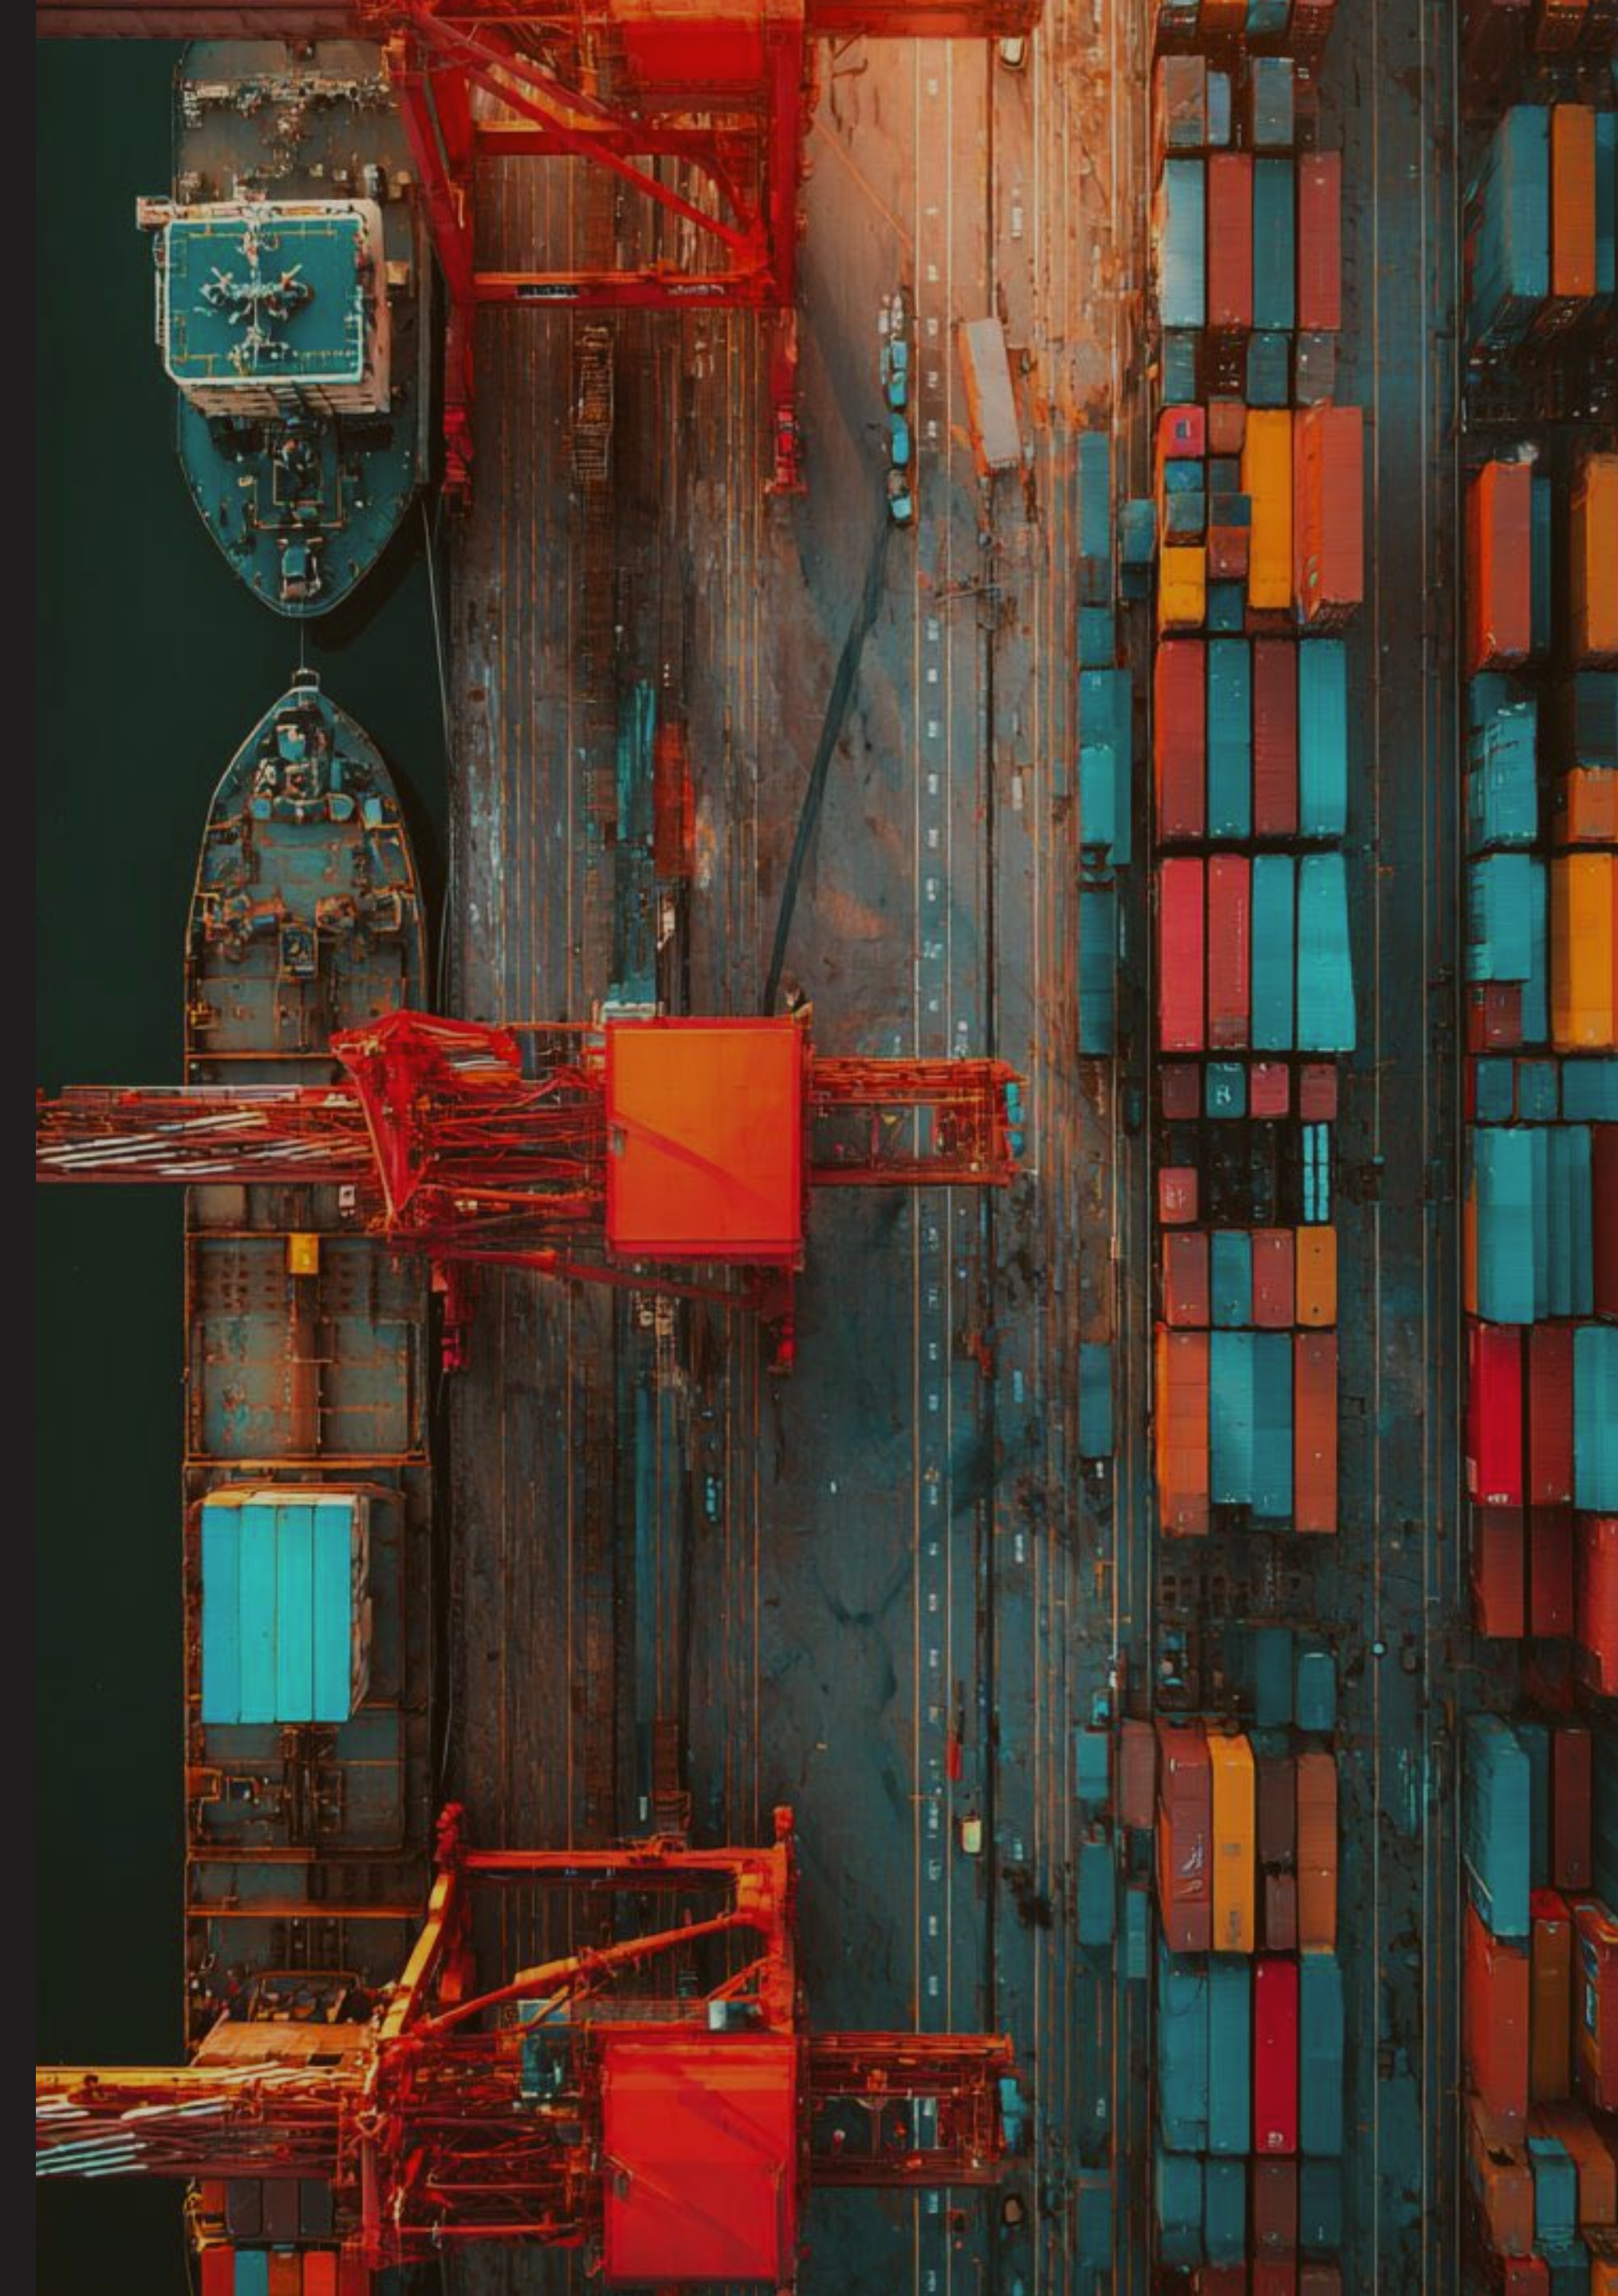

VOYAGE SHIP SERVICE AND MAINTENANCE 24/7

Voyage service remains one of our main business activities which is in high demand among European Shipowners.

Our mobile ship service range includes

- Steel renewal and hull repair
- Welding works of various metal
- Pipe works
- Hatch covers maintenance
- Interior and insulation work
- Machinery and deck equipment repair
- Ventilation and air-condition system service
- Repair of electrical equipment and automatic system

We handle all tasks required to keep your vessel operational while ensuring compliance with the requirements of Classification Societies and Port Authorities.

ENGINEERING AND TECHNICAL CONSULTING

Helsingin Hitsaus engineering and consulting approach is based on modern trends and technologies in the shipping industry.

We are pleased to offer cost-effective solutions for any challenge

- Design and ships concept development
- 3D-scanning and machinery system planning
- Detailed project sketches and drawings
- Technical support and project supervision
- Technical management and repair estimation
- UTM & hull construction fault detection
- Survey & vessel inspections
- Representation of Shipowners in Class, Flag and Port authorities
- Feasibility study & strategic plans for the marine industry

Our team will assist you throughout every stage of the project, ensuring the best possible results.

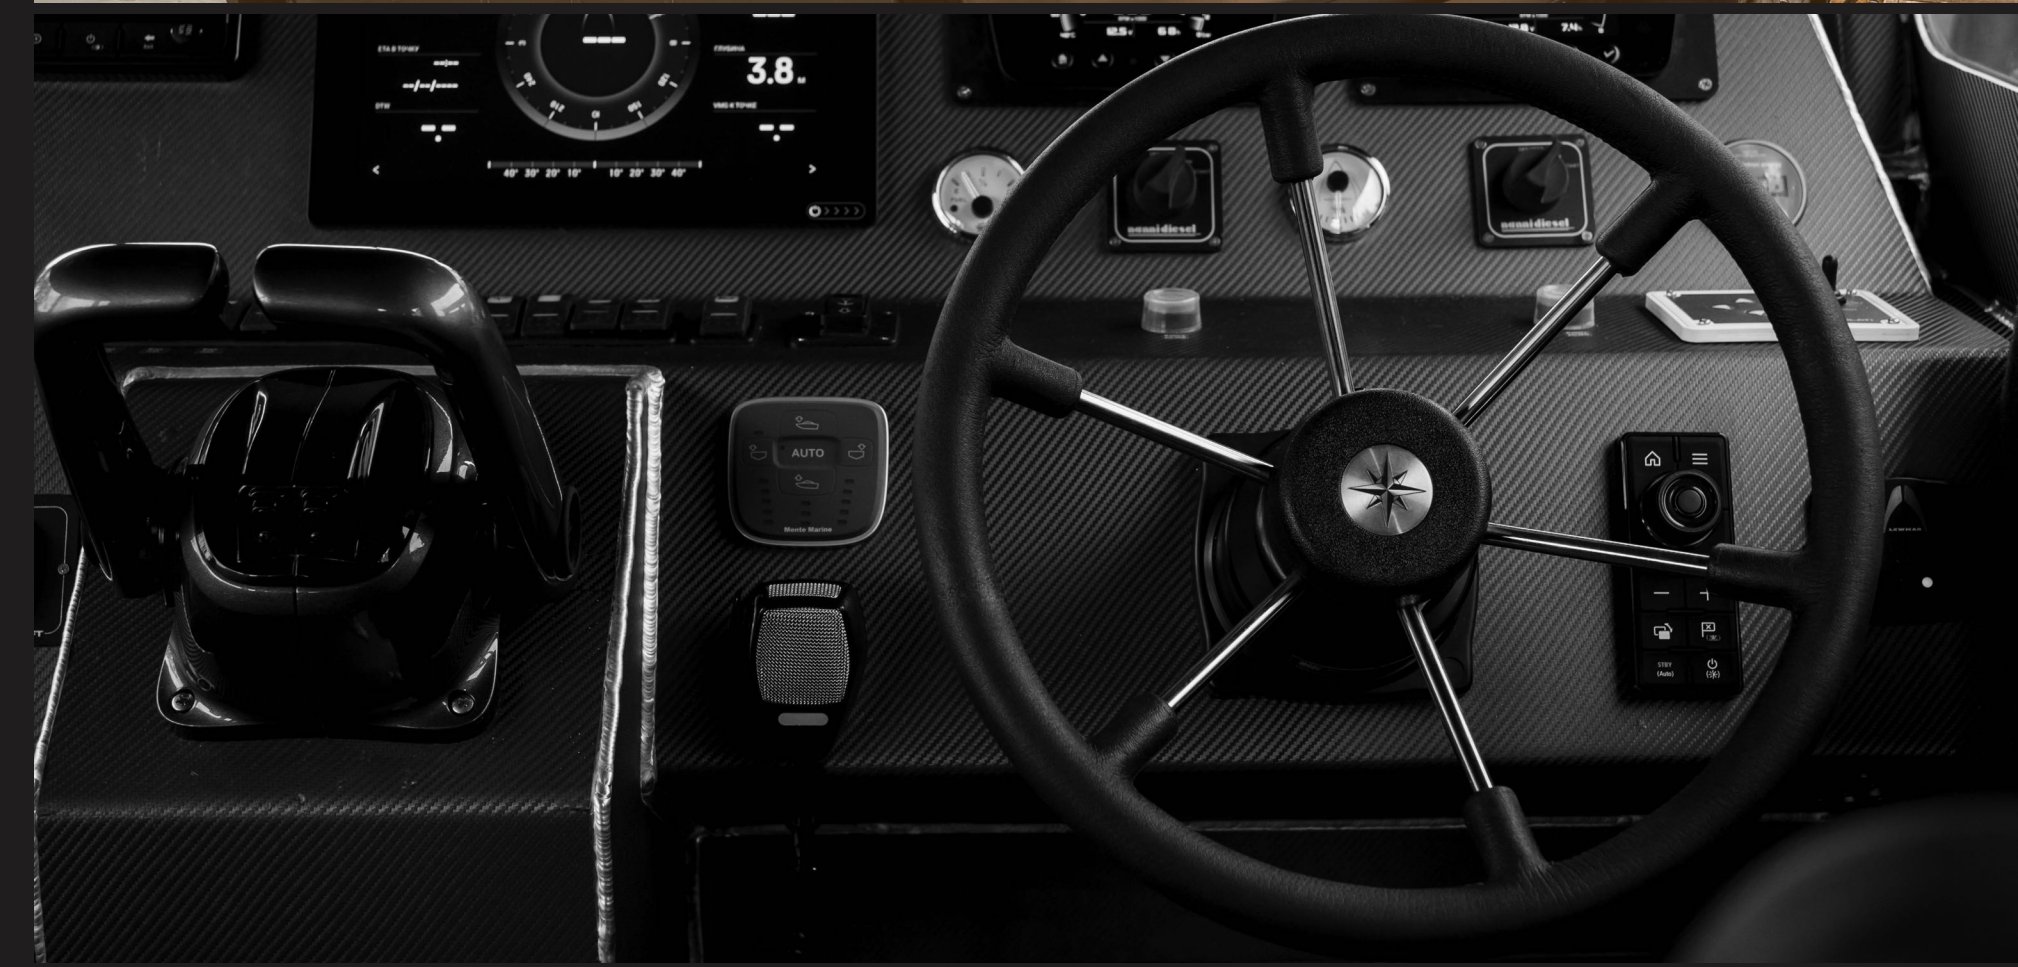

SMALL TONNAGE SHIPBUILDING & ALUMINIUM WORKS

One of Helsingin Hitsaus HH Oy's specialized competencies is the construction of aluminum and stainless-steel workboats as well as various aluminum constructions for commercial and industrial needs.

Our services include

- Turnkey construction of aluminium workboats
- Assembling of aluminum hulls and sections
- Aluminium welding and stainless-steel repairs
- Producing of stainless-steel and aluminium units for marine and industrial needs
- With a strong focus on quality, durability, and operational efficiency, we provide reliable solutions for the maritime market.

Our skills and productive collaboration with ship-design companies were fully implemented in the building of aluminum multi-purpose workboats 'Tundra-7', 'Tundra-12', LC6500 and many others.
